DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 55-64, drawn to a method of discovering one or more patterns in two sequences of symbols comprising a first step of forming a master offset table, classified in class 702, subclass 19.
 - II. Claims 11-20 and 65, drawn to a method of discovering one or more patterns in two sequences of symbols comprising a first step of translating the sequences of symbols into a table of ordered pairs, classified in class 702, subclass 20.
 - III. Claims 21-28, drawn to a method of discovering one or more corrupted patterns relative to a reference pattern, classified in class 702, subclass 20.
 - IV. Claims 29-34, drawn to a method of discovering child patterns, classified in class 702, subclass 20.
 - V. Claims 35-53 and 66-67, drawn to a method of discovering one or more patterns in a set of k sequences of symbols, classified in class 702, subclass 20.
 - VI. Claim 54, drawn to a method of discovering all patterns at all levels of support comprising a first step of creating a Virtual Sequence Array, classified in class 702, subclass 20.

2. The inventions are distinct, each from the other for the following reasons:

The methods of Groups I-VI are distinct, each from the other, because they have different method steps and/or goals. Each would require a non-coextensive non-patent literature search.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different requirements for non-coextensive literature searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1631

4. Notice of Rejoinder of Product and Process Claims where applicable.

In any instance where the examiner has required restriction between product and process claims, and applicant elects claims directed to the product where the product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the even of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.
